

whose religious teachings are opposed to such tests or inoculations. The district may request verification from the religious leader to confirm exemption.

8. Personal or philosophical exemptions to immunization will not be accepted.
9. Non-immunized students, including those with religious, medical, or other statutory exemption, may be excluded from attending school during an outbreak of a vaccine-preventable disease. State and/or local health department officials shall determine the duration of exclusion from school. Vaccine-preventable diseases may include, but are not limited to, the following diseases: Diphtheria, Tetanus, Pertussis, Poliomyelitis, Measles, Mumps, Rubella, Hepatitis B, Varicella and Streptococcus.
10. Students will be excluded from school attendance if they do not comply with the above specifications of Kansas Statute 72-5209.
